DESCRIPTION

These gentle but effective wipes will clean corrosion and other contaminants from battery terminals. The unique color indicator formula will turn from blue to pink in presence of acid, then turn back to blue once the acid is neutralized.

The neutralizing fluid on the wipes does not cause foaming action, and leaves a clean, protective barrier on the terminals and contact areas.

CAUTION

May irritate eyes and skin.

FIRST AID:

IF SWALLOWED: Contact a physician or poison control center immediately. DO NOT induce vomiting. IF IN EYES: Flush eves with water for at least 15 minutes. If irritation is persistent, contact a physician. IF ON SKIN: Wash skin with soap and water. Remove all contaminated clothing and launder separately before reuse. If irritation is persistent, contact a physician.

IF INHALED: Remove person to fresh air. If irritation is persistent, contact a physician.

See M.S.D.S. for complete safety information.

KEEP OUT OF REACH OF CHILDREN

HANDLING AND STORAGE: Keep canister tightly closed when not in use. Rinse empty container before recycling container. Discard used towel in trash.

BATTERY ACID CLEANING WIPES

Unique Color-Indicating Formula

 EXTENDS THE LIFE AND PERFORMANCE OF BATTERIES

May irritate eyes and skin. See side panel for further precautions and first aid instructions.

KEEP OUT OF REACH OF CHILDREN

NET CONTENTS: 30 7" x 8" Premoistened Wipes

Distributed By: Total Solutions™ PO Box 240014 • Milwaukee, WI 53224

DIRECTIONS

Wipe the surface of the battery post, removing deposits. These wipes can also be used to remove corrosion on the connectors and battery trays. The blue wipe will turn pink in the presence of the acidic corrosion. Be sure to keep turning and scrubbing the area until the wipe turns back to its original blue color. This will indicate that the corrosion has been neutralized.

These wipes are only to be used on lead acid batteries.

DIRECTIONS FOR DISPENSING

- 1. Remove lid by lifting upward. Remove foil seal.
- 2. Pull towel from center of the roll and thread through "X" on the underside of the lid.
- 3. Close lid. Pull towel at 90° angle.
- 4. Snap hinged cap back into place to ensure towels stay moist.
