

This hot wax concentrate is a water-beading agent designed for use in automatic car wash systems. Made to be used in the final rinse stage to leave automotive finishes with a bright, waxed appearance after they have been washed.

DIRECTIONS

Dilute 1 part of this concentrate with 10 parts of warm or hot water. Inject 8 ounces of this solution into the final rinse water.

As a beading agent, dilute one part concentrate with up to 30 parts of warm or hot water and inject 8 ounces of this solution into the final rinse water.
