

DESCRIPTION

This product is a scale and corrosion inhibitor for hot water boiler recirculating systems and chilled water recirculating systems. It's phosphate-based formula contains a polymer dispersant for anti-precipitating and sequestering harmful hard water scale. It is the latest technology in closed loop treatment, replacing the toxicity and pollution potential associated with other formulas containing heavy metals.

DIRECTIONS

The dosage of this product will depend on the amount of water contained in the recirculating system. Normal treatment dosage is 1 gallon for every 125 gallons of water contained within the system. This product may be injected directly into the recirculating system through the use of a regular bypass feeder. Mild steel piping and feeding equipment may be used. Control the level of product by maintaining a phosphate (PO_4) level of between 3.0 to 5.0 ppm.

In chilled water recirculating systems, a microbicide is recommended as a preventative treatment or for control if infestation occurs. Some hot water and chilled water recirculating systems may require the use of an oxygen scavenger. Control oxygen scavenger feed rates by maintaining a sulfite (SO_3) level of between 20 to 40 ppm.

LOOP TREAT POLY

ORGANIC POLYMER BASED
SCALE AND CORROSION INHIBITOR

FOR USE IN BOTH
HOT OR COLD WATER
CLOSED LOOPS

WARNING:

Harmful if swallowed.
May cause severe burns.

See back panel for further precautions
and first aid instructions.

KEEP OUT OF REACH OF CHILDREN

SOLD BY:

WARNING:

Harmful if swallowed. May cause severe burns. Do not take internally. Avoid contact with skin, eyes and mucous membranes.

FIRST AID:

If Swallowed: Give person several glasses of water. Do NOT induce vomiting. Obtain immediate medical assistance.

If In Eyes: Flush with plenty of cool water for at least 15 minutes. Obtain immediate medical assistance.

If On Skin: Wash thoroughly with soap and water. If irritation persists, obtain medical assistance.
