

Use a fresh approach to the difficult problem of controlling offensive odors in sewage plants, lagoons, aerators, sewer mains and laterals and for garbage containers and dumps. It effectively neutralizes odors without harming bacterial action in digesters, lagoons, filters, septic tanks or drain fields.

DIRECTIONS

To control odors in aerators, lagoons, open digesters and filter beds, inject undiluted into the line leading to the source of odor. The amount required will vary with the temperature, air movement and intensity of odor to be removed.

Also spray or mist undiluted over the source of odors, allowing air motion to carry it over the area.

To control odors in sewer mains and laterals, pour, spray or drip undiluted into the lines. Also spray thoroughly manholes and drains.

For garbage containers, trucks and dumps, spray liberally over the source of the odor.

CHERRY SEWER SWEETENER

**CONTAINS NO HARMFUL SOLVENTS
WILL NOT DISRUPT BACTERIAL ACTION**

**FORMULATED TO CONTROL OBNOXIOUS
ODORS IN SEWAGE PLANTS, LAGOONS,
MANS & LATERALS, ALSO GARBAGE
CONTAINERS, HAULERS & DUMPS**

CAUTION

May irritate eyes. See side panel for additional precautionary statements and first aid instructions.

KEEP OUT OF REACH OF CHILDREN
